## PROJECTS

### FurniRent, Full-stack Developer

**Furniture-Rental** is an e-commerce website for renting furniture, built using **React.js, Express.js, and MongoDB**. It offers a seamless shopping experience with an intuitive UI and efficient backend for product management.

### Expense Tracker, Full-stack Developer

**Expense Tracker** is a full-stack app to manage income, expenses, and visualize data with interactive charts. Built with **Next.js, Prisma, Neon, and Redux Toolkit**, it features secure auth, filtering, and financial insights.

### My-Portfolio

A modern, responsive developer portfolio built with **React, Next.js, TypeScript, and Tailwind CSS**. Showcasing my projects, skills, and animated background with dark/light theme support.
